CREST EAST COAST INC. TERRITORY MAP

### **CUSTOMER STATUS**

### **OPEN** CUSTOMER (Account):

An account that has never been sold or has not been sold for over One Calendar Year. "Open" customers are available to all company representatives.

### **ACTIVE** CUSTOMER (Account):

An account that has been sold within the Last Calendar Year.

Active customers are available only to the company representative who established the account as "Active" by having made a sale to that customer.

### SHARED CUSTOMER (Account):

An Active account that has two Representatives calling on it as a result of a mutual agreement between the two representatives.

The MASTER Representative is the one that first established the account and is responsible for the 90 day past due money.

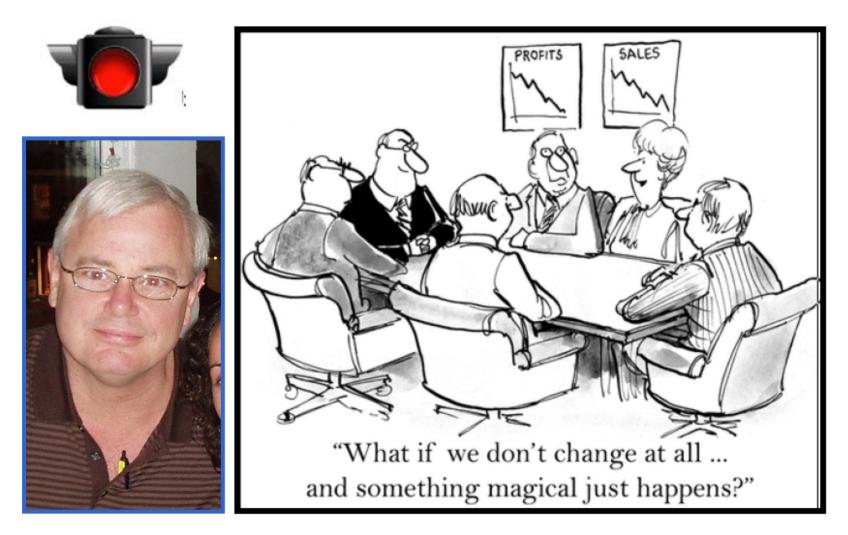

The Master Representative may suspend sales to the customer at any time.

Shared customers are available only to the two company representatives who have established, by mutual agreement, that the two will "Share" the account.

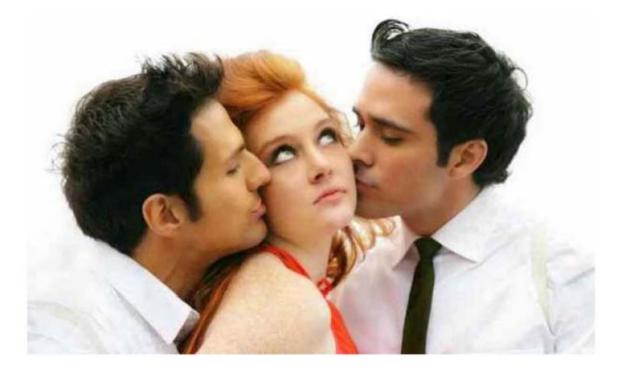

# SALES GOALS

# FAVORITE "OLD SLIDE" RELOADS

### Sales is all about building relationships!

### For you to move in, <u>somebody</u> has to go!

80% of sales require 5 follow-up calls after the meeting. 44% of salespeople give up after 1 follow-up.

# Each year, you'll lose 14% of your customers. Lesson: Never stop prospecting.

Source: BusinessBrief.com

# TRADESHOWS

TO add a little fun to our "LAUNCH" of the New DISASTER RECOVERY KIT ZZ-18 and our DISASTER DETAIL SOUAD, ZZ-19 Promos, we have devised a little Sales Contest!

When the sum of the sales of ZZ-18 and ZZ-19 collectively (the entire Sales Farce) equals 50, Jim, I will contribute "FIFTY DOLLARS" to the "PURSE"!

And for each and every ZZ18+19 sale afterward. TWO DOLLARS will be additionally added to the purse!!

The Purse will be PAID OUT at the SKIPPACK Year End Extravaganza on Saturday Night, December 7th!

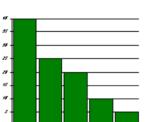

Fifth place gets 5% of the total purse! Fourth gets 10%. Third 20% Second 25% and First Place receives the rest! 40%!

Otherwise enjoy the 20% commissions these Promo's Pay!

What does selling the DISASTER RE-COVERY PROMO'S and a Horse Race have in common?

Answer: Both have a PUR SE!

Crest Buffalo Hide (Stock No. BB-C, BBC-A) is a 2-part urethane Chip Coat/Gravel Guard that has been formulated to match OEM coatings.

#### Directions:

- Buffalo Hide may be applied to properly prepared, primed or painted surfaces and factory E-Coat. <u>Do not apply to bare metal</u>. For best results, prime bare metal (steel/aluminum) with Crest Vers-E-Prime 2K Epoxy Primer (Stock No. BVEP/BVEP-A).
- Clean primed or painted surface with Crest Car Wash Soap (Stock No. BCS) and then with Crest Acry-Solv (AAS or BSA). Surface must be clean and dry.
- 3. Sand primed or painted surface with 180 grit sandpaper, taking care not to expose bare metal.
- 4. Blow away sanding dust with clean, compressed air and final clean with Acry-Solv.
- 5. Tape off edge of surface to be coated with Crest Fine Line Tape (Stock No. RFL ½) and then mask off as required.

#### Mixing

- 1. Mix Ratio is 4:1 (4 parts resin to 1 part activator).
- 2. Product may be tinted by mixing 8 parts BBC-Buffalo Hide Resin, part A with up to 1 part solvent base coat (unreduced). Do not use water based or lacquer based color. Note: Tinting is optional and not required.
- 3. Mix 4-parts resin (tinted or untinted) with 1-part activator. Note: Pot life is 30 minutes at 70° F (21°C) and 50% R.H.

#### Application

- 1. Apply Buffalo Hide with Crest Stock No. GUC-Undercoating gun or equivalent. Nozzle on gun is adjustable for either fine or coarse spray.
- Apply coat #1 to substrate. Recommended air pressure is 80-100 psi. Maintain a distance of 8"-14" from surface to achieve desired texture. Apply a light to medium coat to avoid runs and sags.
- 3. After 15 minutes flash time, apply coat #2.
- 4. Remove masking tape immediately after coat #2 is applied. Do not apply more than 2 coats.
- 5. Recommended coating thickness: 15 mil per coat, 30 mil total dried film thickness.
- 6. Clean all spray equipment with Crest Urethane Reducer (BURF, BURR), BURS) and Crest Gunny Solv (AGS) within 30 minutes.
- 7. For a smoother texture, Buffalo Hide may also be applied with an HVLP gun fitted with a 2.5 tip.

#### Warning: Do not exceed recommended coating thickness (step 5). Specified flash times must be allowed.

#### **Top Coating**

- 1. Solvent Base Paint: Allow final coat to flash 30 minutes before painting.
- 2. Water Base Paint: Allow final coat to flash 2 hours before painting.

\*Vehicle return to service time is 6 hours @ 70° F (21°C) and 50% R. H., fully cured after 24 hours.

Crest Industries, Inc. 1337 King Road, Trenton, MI 48183 800-822-4100 www.crestauto.com

### STEP 3 (CONT.)

### **Application Guide**

- Ster I Surface Preparation
  - May be applied to metal of plastic.
  - Not for bare metal, apply only to primed or painted surfaces.
     For best results, prime bare metal (steel/aluminum) with
- Crest BVEP/ BVEP-A Vers-E-Prime, 2K Epoxy Primer.
- Clean surface first with Crest BCS-Car Soap and then with Crest AAS/ BSA-Acry Solv. Surface must be clean and dry.
- Sand primed or painted surface with 190 grit sandpaper, blow away dust and re-clean with Acry Solv.
- Tape off edge of surface to be coated with Crest RFL ½ Fine Line Tape and mask off as required.

### Step 2 Mixing

- Mix ratio is 4 Parts Resin (Part A) to 1 Part Activator (Part B).
- Buffalo Hide may be timted by mixing up to 8 parts, Part A Resin with 1 part solvent base coat (unreduced). Do not use water based or lacquer based color. Note: Tinting is optional.
- Mix 4-parts Resin, Part A (tinted or un-tinted) with 1-part Activator, Part B. Note: Pot life is 30 minutes.

### STEP 3 Application

- Apply Buffalo Hide with Crest GUC-Undercoat Gun or equivalent. Nozzle on GUC gun is adjustable for either fine or coarse spray. Start with nozzle flow set at approximately 50% open (medium-flow). Recommended air pressure is 80 psi.
- Apply coat #1 to substrate, maintaining a distance of 8"-14". Apply a light to medium "tack" coat to avoid runs or sags.
- After 15 minutes flash time, apply ccat#2. Positioning the gun closer to the surface with a "reduced-flow" nozzle setting will result in less texture. Positioning the gun further away from the surface, with a medium-flow setting will result in heavier texture.
- · Remove masking tape immediately after second coat is applied.
- Maximum coating thickness is 15 mil per coat, 30 mil total dried film thickness.
- Clean all spray equipment with Crest Urethane Reducer (BURF/ BURM/ BURS) and Crest Gunny Solv (AGS) within 30 minutes.
- Tech Tip: Many different textures can be achieved by attering the distance between the spray gun and the surface to be coated and by adjusting the nozzle setting. Experimenting with different spray techniques on a test panel is highly recommended.

### Step 4 Top Coating

- · Solvent Base Paint: Allow final coat to flash for 30 minutes.
- · Water Base Paint: Allow final coat to flash for 2 hours.

### Crest Industries, Inc. 1337 King Road, Trenton, MI 48183 800-822-4100 www.CrestAuto.com

FILM COATING THICKNESS GUAGE

USE TO MEASURE ANY FILM ON METAL!

PREVENT "DIE BACK" DUE TO OVER LOADING THE CLEAR COAT.

PREVENT TEXUTRE COAT FAILURE DUE TO OVER LOADING THE CHIP COAT

THE UNIT WILL PROMPT YOU TO GAUGE EACH OF THE 6 FILM THICKNESS: 0.05mm to 2.00mm

3. Press the MODE button and the ON (ZERO) button simultaneously. All 8.8.8.8 appear, HOLD until 0 0 0 appear, then release.

4. When 000 and the small mmC (LOWER RIGHT) appear you are in "AUTO CALIBRATION MODE". PRESS the unit on to the METAL PLATE to calibrate "0" FILM THICKNESS. TWO BEEPS are sounded to record the reading.

11115

5. The UNIT will then prompt you to gauge 0.05mm. Place the 0.05mm film on the metal plate and GAUGE the 0.05mm film. TWO BEEPS are sounded to record the reading.

6. The UNIT then automatically displays the next calibration film thickness (0.10mm). Repeat as above until all 6 films are calibrated.

7. After the 2.00mm film is calibrated the screen will display OVER indicating the calibration is complete and the unit will shut off automatically.

THE UNIT IS NOW CALIBRATED AND READY FOR USE.

Admit it Norton! I got ya! *Right to the MOON!*

# **13 YEARS OLD**

THE PUCK!

### **OEM Service Team**

Crest Industries, Inc. is a Michigan-based manufacturer and distributor of quality sealants, adhesives, coatings, solvents, aerosols and supplies for the automotive collision repair and service industries. Our newlyformed task force of automotive specialists offer over **100 years** of combined experience, achievements, skills and abilities!

### AREAS OF SPECIALIZATION

Troubleshooting Product Applications Repair Procedures Recalls Service Operations Bulletins Product Supply & Distribution

### Meet the Team:

ED STAQUET

Ed has over 40 years of experience in the collision repair industry. From working in the shop to serving as the Senior Technical Support Specialist for a major adhesive manufacturer and OEM supplier, Ed has seen it all! He has been an I-CAR Instructor for 30 years and named "Instructor of the Year" several times. Ed also received the I-CAR Founders Award and served on the Board of Directors. He has also served on committees for the Society of Automotive Engineers (SAE).

MIKE SCHLAFF

Mike has over 25 years' experience with Crest Industries, Inc. in product development, technical support and operations management. His prior automotive experience extends to the Insurance Industry where he was a Physical Damage Claims Representative. Mike has the required combination of technical skills, product knowledge and business skills to develop a product application and distribution plan to address your needs.

JIM ROGERS

Jim has over 39 years of experience automotive service and collision repain. He has achieved ASE Master Certification Status and has a long tenure as an I-CAR Instructor. Jim was named "Instructor of the Year" on two coossions. He has multiple levels of training in automotive service and body repain. This includes over 33 I-CAR courses and programs offered by Chief, ASE, TRW and Hunter. Previously, Jim owned a collision repair facility in Oxford, MI and then moved to Farmington Hills, MI.
